Address — unresolved discrepancy. Two different office addresses appear across public listings, both citing “5th Floor, Room 501”:

1. Pioneer House, Moi Avenue, Nairobi Central (per Yellow Pages Kenya listing)
2. Akai Plaza, Thika Road (Exit 7), Nairobi (per a third-party site sharing the firm’s phone/email)

Action needed: confirm the firm’s current chambers address directly before publishing a new site — one of these listings is likely outdated.

Court Record (for reference — do not use as marketing content)

The firm appears as a named party in *Aguko Osman & Company Advocates v Georgiou & another* [2024] KEHC 12455 (KLR), a Milimani Commercial Courts ruling on taxation of costs. This is public record, not something to reference on the website — it’s an advocate-fees dispute, not a case the firm handled for a client, and referencing it would serve no marketing purpose.

Legal Advertising Rules to Design Around

The **Advocates (Marketing and Advertising) Rules, 2014** govern what a Kenyan law firm site can say. Key constraints already reflected in how the content above should be written:

- No claims of superiority (“best,” “leading,” “No. 1”)
- No client testimonials or endorsements
- No comparisons with other advocates or firms
- No case outcomes or success rates presented as a selling point
- Factual third-party recognition (e.g., a named directory listing) is safer to include than self-praise, but keep it understated
- Stick to: firm facts, advocate qualifications, practice areas, and general descriptions of services

Content Rules

- Write practice-area pages as plain explanations of the law/process, not sales pitches
- Team bios: qualifications and admission facts only, no subjective claims
- Have a partner sign off on all copy before publishing

Technical Build Options

No-code (fastest): WordPress with a legal-services theme, or Webflow/Framer. **Custom build:** Next.js/Astro front end with a lightweight CMS (for updating the Insights section).

Must-haves regardless of stack: - Mobile-first, since most Kenyan traffic is mobile - HTTPS/SSL - Fast load on average mobile data speeds - WhatsApp Business link alongside the contact form - Google Maps embed once the address is confirmed

Domain & Hosting

- Register the `.co.ke` domain (via a KENIC-accredited registrar) in addition to keeping `.com`
- Local hosting reduces latency for Kenyan visitors; a CDN-backed host (Vercel, Netlify, Cloudflare Pages) also performs well in East Africa

SEO & Discoverability

- Claim and complete a Google Business Profile for the firm’s confirmed office location
- Target locally relevant terms: “conveyancing lawyer Nairobi,” “commercial dispute advocate Kenya,” etc.
- Add `LegalService/Attorney` schema markup

Data Protection (Data Protection Act, 2019)

- Publish a clear Privacy Policy for the contact form
- Register with the Office of the Data Protection Commissioner (ODPC) if applicable thresholds are met
- No pre-checked marketing consent boxes
